Since 1971
Made in Germany

DESCRIPTION OF OPERATION

In the strip supply, a desiccant strip is cut to length and simultaneously sealed onto the inside of the foil of the Stickpack.

The desiccant strip is then located inside the Stickpack. It protects moisture-sensitive pharma products.

The foils used offer better protection against moisture than the thermoformed packs (blister packs) that are already known because the Stickpack has an aluminium barrier all around. Standard foils can be used.

TECHNICAL DATA

Stickpack - length	40-100 mm
Width of Stickpack - transversal seam	28-50 mm
Strip thickness	0.3-1 mm
Strip width	5-10 mm
Strip length	30-80 mm
Speed of strip supply	max. 30 cycles/min
